

COMPLETE PA-SYSTEM STEREO

PA100S BY NOVANEX

With this 100 Watt Stereo PA-system Novanex covers the growing need for a universal keyboard mixer, with the separate possibility to use it as a microphone-amplifier as well. This combination makes it ideal for solo-entertainers. They will appreciate the compactness and the simplicity of the system. And the built-in synchro-compressor will protect them from the stress of equipment-watch during their performance.

The keyboard inputs are as universal as possible: take mono, stereo or double mono as connections: you can plug them all into this new creation of Novanex. Use the individual gain controls and the combined bass- and treble-equalisation to set the right sound. For the microphone input you find an adjusting tone control possibility, to adjust exactly to your specific vocal-sound.

An insert is provided, to connect stereo effects, to complete the system to a professional combination. Used in a bigger set up, lines can be taken off to connect the system to a main PA.

SPECIFICATIONS:

Mike input	Mono jack
Keyboard inputs	Mono or mono-left + mono-right or stereo-jack
Input channels	1 for microphone + 3 for keyboards
Sensitivity	Mike - 10 mV, Keyboards - 1000 mV
